ABOUT

I work like a forward deployed engineer. I embed with the problem, ship into production, and own the integrations that make AI systems actually useful inside real enterprises. At Phamax I lead engineering for Ariya, an AI platform serving global pharmaceutical clients, and the work covers everything that makes applied AI genuinely hard: LLM orchestration with retrieval grounded generation, multi tenant architecture, compliance aware content pipelines, and deep integrations into enterprise systems like Veeva CRM and Salesforce Marketing Cloud. The bar is not a polished demo. It is production uptime, audit trails, and regulated workflows that hold up under real scrutiny. Before this I spent years at Comviva building MobiLytix, a multi tenant MarTech platform at scale, which is where distributed systems, Kafka, Postgres, and the kind of edge cases you only see in production became part of everyday work. My career started at TCS in the life sciences unit and that is where the instincts for regulated industry work were formed. What I keep coming back to is applied AI where the integration layer is where the real moat lives.

WORK EXPERIENCE

Phamax — **Bengaluru, India**

Ariya — AI platform for pharma that streamlines content generation, information research, analytics, and engagement.

May 2025 – Present

Principal Engineer (Ariya Platform)

Leading engineering for Ariya, an AI-powered platform transforming pharmaceutical content workflows, research, analytics, and engagement. Driving the design and delivery of scalable, compliant, and intelligent systems integrating generative AI with enterprise ecosystems.

Highlights

- Architecting core systems for Ariya, an AI platform enabling end-to-end pharmaceutical workflows across content creation, research, analytics, and engagement.
- Built the AI Content Wizard and end-to-end content lifecycle management system covering authoring, approval workflows, compliance validation, and omnichannel distribution.
- Developed advanced LLM orchestration frameworks including prompt engineering, context injection, and retrieval-based augmentation (RAG) for high-quality, compliant content generation.
- Integrated Ariya with enterprise ecosystems including Veeva CRM, Salesforce Marketing Cloud (SFMC), and external data platforms for seamless data and engagement workflows.
- Led development of a centralized Data Catalog enabling metadata-driven discovery and self-serve data access across business and engineering teams.
- Implemented scalable, governed architecture with auditability, traceability, and optimized AI/data pipelines using caching and vector databases for performance and cost efficiency.

Comviva — **Bengaluru, India**

MobiLytix™ Rewards & MobiLytix™ Digital Marketing Product

https://www.comviva.com/products-solutions/martech/cvm/mobilytix-rewards/

December 2021 – March 2025

EDUCATION

2014 – 2018

Birla Vishvakarma Mahavidyalaya Engineering College, Vallabh Vidyanagar

https://bvmengineering.ac.in/

Bachelor of Engineering

Computer Engineering

SKILLS

Platform Engineering & DevOps

- Source Control Governance
- CI/CD Pipeline Architecture
- Automated Deployments
- Infrastructure as Code (IaC)
- Code Quality & Testing Standards
- Security and Compliance Automation
- Observability & Monitoring

Artificial Intelligence

- Large Language Models (LLMs)
- Generative AI Systems
- Agentic AI and Multi-Agent Systems
- Retrieval-Augmented Generation (RAG)
- Context Engineering
- Prompt Optimization
- LangChain and LangGraph
- LlamaIndex
- Model Context Protocol (MCP)
- Tool Use and Function Calling
- AI Safety and Guardrails
- AI Evaluation and Testing
- AI-Augmented Workflows
- Vector Search & Databases
- AI Content Generation Pipelines

Technical Lead

MobiLytix™ Rewards is a next-generation engagement marketing solution designed to power loyalty programs and promotional campaigns across industries.

Highlights

- Leading the modernization of the MR platform into a cloud-agnostic SaaS product with AI/ML integration.
- Driving architecture and feature development using TypeScript, React, FeatherJS, Delta Lake, Postgres, and vector databases.
- Delivering major improvements in scalability, performance, and user engagement through data-driven personalization.

Comviva — Bengaluru, India

MobiLytix™ Digital Marketing Product

https://www.comviva.com/products-solutions/martech/cvm/mobilytix-digital-marketing/

June 2020 – November 2021

Senior Engineer

Contributed to the development of an omni-channel marketing automation platform designed to help enterprises engage customers across digital touchpoints.

Highlights

- Delivered 14+ integrations including Shopify Public App, Seatgeek, HubSpot, AWS QuickSight, GoodData, Matomo, WooCommerce, WordPress, Batch Push, and Unlayer Editor.
- Implemented ML-driven insights using Google BigQuery and GoodData for personalized campaign optimization.
- Enhanced performance through query optimization, caching, and CDN strategies.
- Addressed complex integration challenges related to scalability, data security, and performance optimization.

Tata Consultancy Services (TCS) — Gandhinagar, India

Worked in the Lifesciences domain, delivering digital transformation solutions for global clients.

https://www.tcs.com/what-we-do/industries/life-sciences/solution/tcs-lifesciences-interactive

September 2018 – May 2020

Assistant System Engineer

Highlights

- Developed and delivered full-stack applications using ReactJS, Angular, NodeJS, and ExpressJS.
- Enabled business collaboration using Microsoft 365 suite including SharePoint, Teams, Power Automate, and Power BI.
- Implemented GA360-based analytics solutions using Google Analytics, Tag Manager, and Data Studio.
- Contributed to scalable, data-driven decision-making through end-to-end digital solutions.

VOLUNTEER

Google Developer Groups Ahmedabad

https://devfest.gdgahmedabad.com/

September 2018 – Present

Agentic AI Frameworks & Tools

LangChain | LangGraph | LlamaIndex | Anthropic Claude API | OpenAI API | Hugging Face Transformers | Ollama | Vercel AI SDK | Pinecone | Weaviate | ChromaDB | pgvector

Programming Languages

JavaScript | TypeScript | Python | SQL | Go | HTML5 | CSS3

Frameworks & Tools

ReactJS | NodeJS | ExpressJS | FeathersJS | Strapi | Kafka | Nifi | Contentful | Redux | Shopify SDK | GraphQL & REST APIs | Git & GitHub Actions | OpenAI API & LLM Integrations | LangChain & LangGraph | Anthropic SDK | Vercel AI SDK | FastAPI | Next.js | Storybook | Zustand | ShadCN/UI | Turborepo

Databases

PostgreSQL | MongoDB | BigQuery | Redis | Cassandra | IndexedDB

Data Visualization & Analytics

Google Data Studio | Power BI | AWS QuickSight | Metabase | GoodData

Design & Prototyping Tools

Figma | CorelDRAW | Affinity Designer Suite | Procreate

Creative Designer

Lead the design team for the GDG Ahmedabad chapter, creating event visuals, branding assets, and social media graphics for community events.

GirlScript

https://gssoc.girlscript.tech/

February 2020 – May 2020

GirlScript Summer of Code 2020 Mentor

Mentored open-source contributors during the GirlScript Summer of Code 2020 program, guiding them in project architecture, code reviews, and development best practices.
